Explanatory note by the Selectmen:

At our March Town Meeting in the year 1917, the town voted to extend the town water to Green Grove Cemetery. The town that year bought the pipe for the extension, but did not make the extension. The Selectmen this year decided to dig the ditch, lay the

pipe, and make the extension, which has been done. The same year, 1917, the salary of the Electric Light Commission was not paid as it seemed advisable for the town to fix said salary by vote at the Town Meeting as it was the first time in the history of the town that there had been such a commission. Then there were in the same year, 1917, two bills of Dr. J. M. Cheney and Dr. L. M. Orton, which were not paid, which belong properly to the business of the year 1917. We as selectmen make this explanation in order that the citizens may see at a glance why we have not more money in the Town treasury at the close of year ending Jan. 31, 1919.

From the above report it will be seen that the fire damage was \$4,837.19, which is an expense we hope and trust will never happen again. Notwithstanding the added expense we were supposed to make this year besides the maintenance expense. With the interruption of service caused by the fire and the inability to get the necessary material when needed we have been able to meet all our regular expenses, have paid \$1,601.92 towards the fire damage and have furnished town hall, hose house, town clock and street lights. We think we can get along another year or two with the old boiler.

CURT E. EASTMAN, Town Clerk.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

ASHLAND SPECIAL SCHOOL DISTRICT

To the Citizens of Ashland:

The abnormal conditions prevailing this year have affected the schools to a marked degree. The demand for teachers far exceeded the supply; the epidemic forced the schools to be closed for about eight weeks; sickness among parents and pupils caused irregular attendance for a time even when the schools were in session; the enforced vacations resulted in a number of withdrawals from the high school, the pupils having drifted into other activities. All the resulting retardation in the work cannot be made up, but if there is no further break in the school year and the attendance of the pupils is maintained at a high average, the minimum essentials, at least, can be covered in a creditable manner. Only regular attendance and good attention to work by every pupil will permit general promotion this year. Parents are urged to cooperate to this end in every way possible for no consideration can be given next June to pupils whose attendance for the rest of the year may have been irregular, or whose attention to their work noticeably poor.

The following is a list of teachers at present in the employ of the district, and the number of pupils enrolled in the schools:

High school: Herbert C. Lowell, Headmaster, science, history; Miss Pearl Hood, Latin, French, mathematics; Miss Mary Hamblett, domestic arts, English; Mrs. Edna Goddard, book-keeping, English. 53 pupils registered last September, of whom 17 boys and 29 girls are still enrolled.

Grade	Teacher	Boys	Girls
I	Miss Mary Roberts	21	18
II	“ Blanche Rogers	16	15
III	“ Anna Holland	12	15
IV	Mrs. Minnie Thompson	15	9
V	Miss Caro Clay	11	15
VI	“ Anna Lawrence	12	6
VII	Mrs. Carrie Jackson	12	11
VIII	“ Edna Goddard	11	9

The manual training work at present is under the charge of a student from the Plymouth Normal School. The arrangement, though temporary, is proving satisfactory.

There have been some changes made in the school program of studies to conform more nearly to the coming requirements of the state department. For several years a new program has been in process of formation, and at the end of this year high schools are supposed to be in position to readily adopt its desirable features. In view of these added requirements, French, geometry, algebra, science, manual training, cooking and sewing are now taken up in grades VII and VIII, and either less time is given to them in the high school or else advance work is required in these subjects. The manual training, cooking and sewing introduced this year in grades VII and VIII are of great interest to the pupils and will prove most beneficial. Application will be made to have these grades approved by the state department as a regular Junior High school.

The new program is more practical than the old one; will demand better and more thoughtful work by the pupil; and will remove that dividing line at the end of the VIII grade which was both unnatural and detrimental.

The outline of study as published last year in the Town Report is being followed this year wherever prac-

ticable. It does not seem best to reprint the same.

On another page will be found the program of studies for grades IX to XII.

I wish to thank the members of the school board for their hearty cooperation and assistance.

Respectfully submitted,
C. M. HARRIS, Superintendent.

The foregoing report of the superintendent is hereby approved and, as required by law, we herewith submit estimates for the next year:
